## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 1) Claim 15 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 recites the limitation "the fiber surface" in line 2. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2) Claims 1-2, 4-15, are rejected under 35 U.S.C. 102(e) as being anticipated by Pittman (6,670,035).

Claims 1-2, 8-10: Pittman discloses wood pulp fluff fibers having a particulate material, such as calcium oxide or magnesium oxide, attached to a retention aid, such as polyamides, in an amount from about 0.1% to about 1% based on the weight of the polyamide. Since the weight of the polyamide is within the range of 5% to 75% of the weight of the fiber, the amount of the material calculated to be within the claimed amount of the weight of the pulp fiber. Polyamide is a retention aid as disclosed in the present specification , pg. 3, lines 1-5. Such other materials, as talc or calcium carbonate, may be considered as fillers (col. 4, lines 14-63). It is inherent that the particulate material of Pittman is capable of reducing hydrogen sulfide, since it is the same material in the same amounts as disclosed in the present invention.

Claims 4-6, 11-13, 15: the wood pulp fluff fibers of Pittman disclosed above are made into sheets by wet-laid method, the sheet are of basis weight of up to 500 gsm. The sheets are dried (col. 5, lines 35-65).

Claims 7, 14: the products formed are absorbent (col. 5, lines 1-34).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1731

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

- 3) Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pittman in view of Hochwalt (US 2002/0054919). Pittman is applied as above for claim 1; Pittman fails to disclose that the particulate material is zeolite. Hochwalt discloses zeolite (Abstract) used for the purpose of reducing odors from hydrogen sulfite [0003, 0007]. It would have been obvious to combine the teachings of Pittman and Hochwalt, because such a combination would permit the product of Pittman to remove a wide variety of odors as disclosed by Hochwalt [0003].

### ***Conclusion***

- 4) Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark Halpern whose telephone number is 571-272-1190. The examiner can normally be reached on Monday to Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steven Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
